Business Administration student and Python developer specializing in data automation, web scraping, and data processing pipelines. Experienced in processing datasets, writing Python automation scripts and integrating AI (LLMs) into workflows to solve business problems. Highly capable of analyzing performance metrics and automating reporting processes.

Areas of Expertise

Data & Analytics: SQL, SQLite, aiosqlite, Data Visualization, A/B Testing, Performance Metrics.

Scripting & Automation: Python, FastAPI, Pydantic, asyncio.

AI & LLMs: Ollama (Local LLMs), Claude Code, OpenCode, API integrations.

Dashboard/UI Development: JavaScript, React, Tailwind CSS (for custom data visualization).

Tools: Docker, Git, REST APIs, Excel.

Work Experience

AI Python Developer

Feb 2026 – Present | Remote

IAC Media Network

- Wrote and executed custom Python scripts using FastAPI and Pydantic to clean, process, and manipulate large external datasets.
- Built "Trend Finder", a custom interactive data dashboard featuring a React and Tailwind CSS interface to visualize performance metrics and validate ideas.
- Engineered an "Audience Drop-off Analysis" tool to query analytics and transcript data, identifying viewer retention patterns and data trends.
- Integrated AI via local LLMs (Ollama/gemma4:12b) into backend workflows to process text and generate automated responses.
- Programmed a 'Brand Deal Engine' using Python and Pydantic to automatically scrape, filter, and validate unstructured business and creator data.
- Managed relational databases using SQLite and aiosqlite to query and store user data for a containerized bot application.

Digital Marketing Intern

Apr 2026 – May 2026 | On-site

METRO Romania

- Conducted UX audits and SWOT analysis for corporate B2B marketing channels
- Wrote an AI-based PDF generator to write Meta and Google campaign briefs.

Editor & Youtube Channel Management

Dec 2020 – Apr 2026 | Remote

Freelance

- Cut content research time by 60% by writing Python scripts to source trends.
- Increased monthly recurring revenue by 15% for two clients using thumbnail A/B testing and publishing cadence changes.
- Monitored performance indicators to scale 3 channels from zero to 9M+ views in under 3 months.

Projects

Tough Love (AI Accountability Coach) – In Development

- Developing a habit-tracker and anti-procrastination mobile app featuring image verification and points, leaderboards and squads.
- Programmed a full Dart and TypeScript codebase, managing state and user data logic.

Education

Business Administration (FABIZ) - English Major

Oct 2024 – Jul 2027 (expected)

ASE București

- Relevant coursework:** Business Process Management, CRM, Finance, Statistics, Law, Economics, Machine Learning, SAP, Marketing.

Additional Skills & Certifications

- **SQL Associate** - DataCamp (Apr 2026)
- **AI Fluency: Framework & Foundations** - Anthropic (Jul 2026)
- **Claude 101** - Anthropic (Jul 2026)
- **AI Essentials** - Google (Apr 2026)
